

ENERGY EFFICIENCY REPORT

HELP US KEEP ENERGY PRICES LOW!

South Utah Valley Electric Service District is proud to serve its customers with more ways to save energy and money. By conserving energy, you can help South Utah Valley Electric Service District maintain a sustainable energy future, save money, and keep energy prices low. South Utah Valley Electric Service District will now be providing an Energy Efficiency Report online to help you learn about your household energy use and help you save money. Login at www.sesdofutah.com

The difference between your total electric bill minus the electric bill of the efficient neighbor in the last year.

Efficient neighbor cutoff is the minimum usage for the 15th percentile of occupied homes

You: Your usage for the current month
Average neighbor shows the median users usage for the current month

My Energy Efficiency Report

Compare
Month: Year:

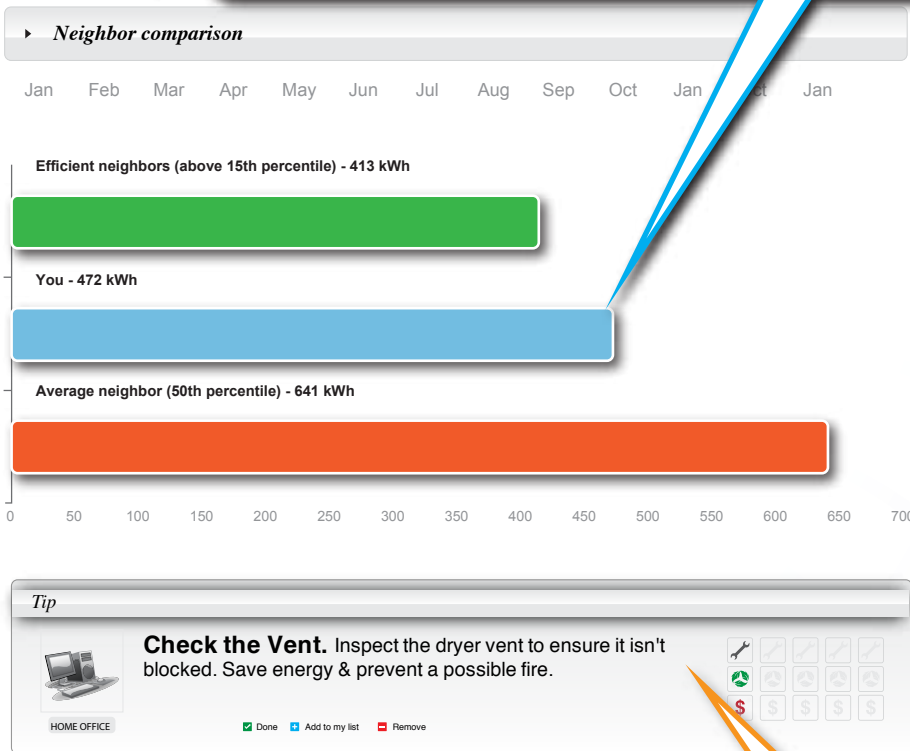

Neighbor comparison

Current Spending / saving

You spent \$25.91 more than your efficient neighbor this month

Like your home

Your neighbors: 144 homes in your area with approx 2656 finished sq ft & built around 1995

Homes of approximately the same size and age that have similar use patterns of electricity. (This helps to group homes with similar heat sources.)

Targeted tips based off the information we have about the home.
